PASSION: The Eco Solution Our Planet Has Been Waiting For

About **ECO**  **STRAWS**

“It’s just one straw,” said 8 billion people.

We believe actions speak louder than words.

We provide Reed, Grass, Hay, Bamboo, and Kraft Paper straws. All are zero waste and biodegradable. These sustainable options are safe for our planet, our families, and the daily happenings in between.

Plastic straws are a small piece of a larger problem of single-use plastic such as plastic bags, forks, to-go boxes, and cups. Be on the lookout for more eco-friendly products.

Being a daily conscious consumer is our mantra. We stand for our planet, this is our last straw.

The planet thanks you.

MISSION: Our Solution is Less Pollution

Growing up in the US, we were taught in school to reduce, reuse and recycle. Reduce being the most important. Reuse would entail giving a second life or repurposing a product. Many environmental programs focus on the recycle portion. This is the last step and although important, the U.N. Environment reports just nine percent of the world's nine billion tons of plastic has been recycled. We shake our head in disbelief!

Our company focus is to reduce the US consumption of over 500 million plastic straws used everyday.

Eco Straws is looking forward to providing the US with a simple and sustainable solution.

We are proud to share with you earth conscious products for your juices, smoothies, cocktails and coffees.

Our Eco Products

Reed Straws

Grass Straws

Hay Straws

Bamboo Straws

Kraft Paper Straws

Our Allegiance to the Planet

Zero Waste & Biodegradable

A Renewable & Sustainable Option

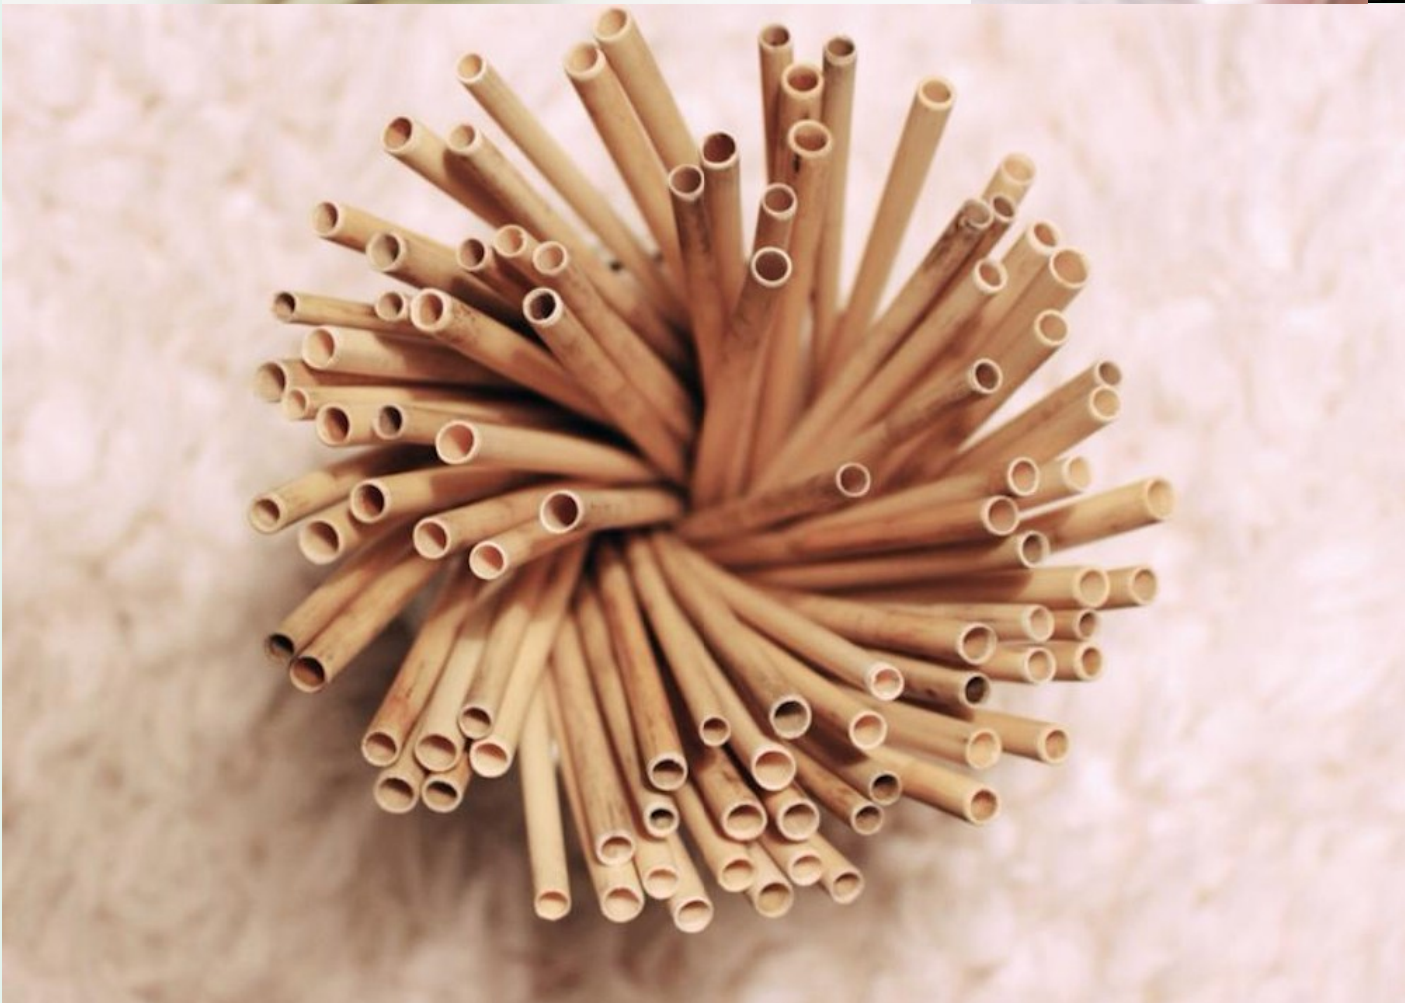

Earth & Marine Friendly

Requires No Special Environmental Conditions To Breakdown Straws

We Mean Business Any Questions, Comments or Concerns?

Please reach out! We are all living on the same planet and deserve only the best eco friendly options for ourselves, our friends and family!
